

The South Central Wastewater Authority is seeking statements of qualifications for professional engineering services related to upgrading and/or modifying the existing treatment process to meet the nutrient reduction goals of 4.0 mg/l for nitrogen and 0.3 mg/l for phosphorous. Copies of the request for proposals can be obtained from James Gordon, assistant executive director, at jgordon@arwava.org and (804) 861-0111 ext. 202.
